IMAGE SEQUENCING TEMPLATE

The Image sequencing template allows authors to create activities based on image sequencing, which need to be arranged in a particular order. Learners are presented different images which are displayed in a random order and have to use drag and drop actions to reorder them based on the task description and on the correct order.

Tips

- Always fill in the *Image description* for images to allow screen readers to view and read the content. Note that the description will appear below the image.
- You can upload an audio file associated to the image or to help learners to identify the image.
- You can allow learners to resume the activity at the current stage they are by activating the option Add button for resuming from the current state .
