## EXECUTIVE SUMMARY

D4.3 Integrated Platform testing report presents the feedback and the experiences collected from the INCLUDEME Project partners on the use of the INCLUDEME Platform. The deliverable reflects the platform readiness for piloting in **WP6. Evaluation and piloting**, as well as for exploitation.

The feedback was collected via a questionnaire shared with all the project partners. It includes quantitative and qualitative evaluations of the main components of the platform. The main evaluation criteria were ease of use, effectiveness, innovation potential and overall design.
